Back in 2019, I wrote my first line of code which is the famous "Hello World". Fast-forward to today, and I have had the privilege to attend [Orange Coding Academy](#) to hone my [web development](#) skills in [HTML 5](#) , [CSS 3](#) and [Bootstrap](#).

My main focus is building [user friendly](#) websites that provide a great [user experience](#) — websites that don't only look good, but feel good too. In my free time, I solved over 100 [problem solving](#) excercises on websites like [codeforces.com](#) and [leetcode.com](#) using [python](#) programming language

When I am not on the computer, you would find me reading, playing chess or hanging out with friends and family.
