My Frameworks

Skills

S1. Create mockups
for an application

Level 1

Level 2

Level 3

Create mock-ups for an application

Tasks to perform

Using a specified mock-up tool, reproduce a mock-up created on the same tool. Describe the elements of the style guide used and the planned security features. Formalize the interface links using the example provided as inspiration. Be capable of demonstrating that the mock-up adapts to mobile devices. Be capable of explaining the reasons for choosing ergonomics for a positive user experience.

Assessment criteria

The mock-up is consistent with the original mock-up. The interface links are formalized in a diagram. The style guide elements, security features and the ergonomic and adaptability elements are identified and described verbally or in a document.
